

APHASIA AND LANGUAGE THEORY TO PRACTICE

aphasia and language theory pdf

Aphasia is an inability to comprehend or formulate language because of damage to specific brain regions. This damage is typically caused by a cerebral vascular accident (), or head trauma; however, these are not the only possible causes. To be diagnosed with aphasia, a person's speech or language must be significantly impaired in one (or several) of the four communication modalities following ...

Aphasia - Wikipedia

Various aspects of multilingualism have been studied in the field of neurology. These include the representation of different language systems in the brain, the effects of multilingualism on the brain's structural plasticity, aphasia in multilingual individuals, and bimodal bilinguals (people who can speak one sign language and one oral language).). Neurological studies of multilingualism are ...

CASL-2 Coming November 2016 Measure language skills thoroughly. Comprehensive Assessment of Spoken Language (CASL) is an individually and orally administered, research-based, theory-driven oral language assessment battery for ages 3 through 21.

Comprehensive Assessment of Spoken Language

Thickening a patient's liquids is a decision that should not be made lightly and should always be individualized per patient medical history. As we know, the thicker the viscosity, the slower it moves therefore making it easier to swallow. However, if this thicker liquid is aspirated it may take three times longer to recover if aspiration pneumonia develops (Robbins, et.al, 2008).
