GraphQL and review GraphQL code, followed by a few more slides and a Relay demonstration and code review, then spend the last 10 mins answering any questions (we can go longer if needed for questions)

Presenter: Eric W. Greene

GraphQL creates a uniform API across your entire application without being limited by a specific storage engine. Write GraphQL APIs that leverage your existing data and code with GraphQL engines available in many languages. You provide functions for each field in the type system, and GraphQL calls them with optimal concurrency.
