Local variable type inference This is a feature of C# 3.0.. C# 3.0 introduced type inference, allowing the type specifier of a variable declaration to be replaced by the keyword var, if its actual type can be statically determined from the initializer.This reduces repetition, especially for types with multiple generic type-parameters, and adheres more closely to the DRY principle.

C Sharp syntax - Wikipedia

Early computers were built to perform a series of single tasks, like a calculator. Basic operating system features were developed in the 1950s, such as resident monitor functions that could automatically run different programs in succession to speed up processing. Operating systems did not exist in their modern and more complex forms until the early 1960s.
