

ESSENTIALS OF ABNORMAL PSYCHOLOGY 8TH EDITION CENGAGE

essentials of abnormal psychology pdf

Abnormality (or dysfunctional behavior) is a behavioral characteristic assigned to those with conditions regarded as rare or dysfunctional. Behavior is considered abnormal when it is atypical or out of the ordinary, consists of undesirable behavior, and results in impairment in the individual's functioning. Abnormality is that which is considered deviant from specific societal, cultural and ...

Abnormality (behavior) - Wikipedia

Psychology is the science of behavior and mind (not to be confused with neuroscience, which studies the neural underpinnings of psychological phenomena). Psychology includes the study of conscious and unconscious phenomena, as well as feeling and thought. It is an academic discipline of immense scope. Psychologists seek an understanding of the emergent properties of brains, and all the variety ...

Types of pain: Nociceptive vs. neuropathic . Nociceptive (body) pain comes from damaged tissues outside the nervous system, such as muscles and joints. People say the pain feels aching and throbbing. Neuropathic (nerve) pain comes from the nerves that transmit pain signals from the body to the brain. People describe the pain as burning, stinging, or shooting.
