A greenhouse gas is a gas that absorbs and emits radiant energy within the thermal infrared range. Greenhouse gases cause the greenhouse effect. The primary greenhouse gases in Earth's atmosphere are water vapor, carbon dioxide, methane, nitrous oxide and ozone. Without greenhouse gases, the average temperature of Earth's surface would be about 18 °C (0 °F), rather than the present average ...

Greenhouse gas - Wikipedia

A greenhouse (also called a glasshouse, or, if with sufficient heating, a hothouse) is a structure with walls and roof made chiefly of transparent material, such as glass, in which plants requiring regulated climatic conditions are grown. These structures range in size from small sheds to industrial-sized buildings. A miniature greenhouse is known as a cold frame.

Greenhouse - Wikipedia

The Flood and Bench Irrigation Line for Greenhouse Growers. This next generation of innovative but simple systems from Delta T offers today's growers the highest levels of quality and reliable performance in both flood floors and benches.

Introduction. This is a time of huge opportunity. In the second half of 2015, world leaders will agree on new Sustainable Development Goals and how to finance them, and negotiate a comprehensive new climate change treaty.

NCE 2015

1. Introduction. The management of risk in operations/supply chains has emerged as one of the principal research topics in the recent operations and supply chain management (SCM) literature (Narasimhan and Talluri, 2009, Gurnani et al., 2011, Tang et al., 2012). This interest is cultivated by the continuing uncertainty for the world economy, business trends such as increased outsourcing ...
