When I was pregnant with my third child, I had a feeling that something was very different. The twenty week ultrasound confirmed my fears when our sweet baby was diagnosed with renal agenesis (Potter's Syndrome), and we were told that she would either be stillborn or live for only a very short time after birth.

"I think we have deluded ourselves into believing that people don't know that abortion is killing. So any pretense that abortion is not killing is a signal of our ambivalence, a signal that we cannot say yes, it kills a fetus, but it is the woman's body, and therefore ultimately her choice." –Faye Wattleton, President of Planned Parenthood, Ms. Magazine, 1997

During Tudor times, swaddling involved wrapping the new baby in linen bands from head to foot to ensure the baby would grow up without physical deformity. A stay band would be attached to the forehead and the shoulders to secure the head. Babies would be swaddled like this until about 8 or 9 months.

Over the years, our team has seen countless parents come to us for help with their 4 month old babies sleep. Why? Simple – it’s the 4 month sleep regression This article will explain why “good” sleepers sometimes turn “bad” around the 4 month old mark, also known as the 4 month sleep regression. For most babies, the 4 month sleep regression occurs right around the 4 month mark, but ...
