A fifth-generation programming language (5GL) is any programming language based on problem solving using constraints given to the program, rather than using an algorithm written by a programmer. [citation needed] Most constraint-based and logic programming languages and some other declarative languages are fifth-generation languages.

Bloomington, Ill. (September 19, 2016) — In many U.S. states, drivers are all too familiar with deer crossing signs, but do they really know how close the danger may be? State Farm has released its annual deer claim study, which ranks states by the potential drivers had of hitting a large animal, including deer, elk and moose over a given time period.
