Qualys, Inc. provides cloud security, compliance and related services and is based in Foster City, California. Founded in 1999, Qualys was the first company to deliver vulnerability management solutions as applications through the web using a "software as a service" (SaaS) model, and as of 2013 Gartner Group for the fifth time gave Qualys a "Strong Positive" rating for these services.

Qualys - Wikipedia

Oracle acquired Sun Microsystems in 2010, and since that time Oracle's hardware and software engineers have worked side-by-side to build fully integrated systems and optimized solutions designed to achieve performance levels that are unmatched in the industry. Early examples include the Oracle Exadata Database Machine X2-8, and the first Oracle Exalogic Elastic Cloud, both introduced in late 2010.

I/O request packets (IRPs) are kernel mode structures that are used by Windows Driver Model (WDM) and Windows NT device drivers to communicate with each other and with the operating system. They are data structures that describe I/O requests, and can be equally well thought of as "I/O request descriptors" or similar.

I/O request packet - Wikipedia

Synthèse. Il existe deux voies de synthèse du baclofène. La première voie consiste en la condensation de 4-chlorobenzaldéhyde avec deux molécules d'acétoacétate d'éthyle, suivie d'une hydrolyse et une décarboxylation, qui permettent d'obtenir un acide glutarique substitué. Une déshydratation est produite lors de la cyclisation vers un anhydride, le produit est ensuite mis à réagir ...

When investing in cyber security resources, information security managers have to follow effective decision-making strategies. We refer to this as the cyber security investment challenge. In this paper, we consider three possible decision support methodologies for security managers to tackle this challenge.
