Self-Determination Theory (SDT) is a theory of motivation.. It is concerned with supporting our natural or intrinsic tendencies to behave in effective and healthy ways. SDT has been researched and practiced by a network of researchers around the world.. The theory was initially developed by Edward L. Deci and Richard M. Ryan, and has been elaborated and refined by scholars from many countries.

Jordan Peterson references Aleksandr Solzhenitsyn in almost every interview, talk, or text he delivers. His admiration for the Russian author is considerable and is made clear in 12 Rules for Life. In 12 Rules, Peterson refers (p.115) to Solzhenitsyn as “the great writer, the profound, spirited defender of truth.” He writes (p.116) that Solzhenitsyn was an extremely brave man whose courage ...

We first examined the extent to which the Big Five personality traits predicted each of the four learning styles (see Table 2). We found that neuroticism, openness, and conscientiousness explained 30% of the variance in synthesis-analysis, $F(5, 300) = 25.49$, $p < .001$; openness and conscientiousness explained 19% of the variance in elaborative processing, $F(5, 300) = 14.43$, $p < .001$; openness ...

The Big Five personality traits, learning styles, and

Freud believed that life was built round tension and pleasure. Freud also believed that all tension was due to the build-up of libido (sexual energy) and that all pleasure came from its discharge.. In describing human personality development as psychosexual Freud meant to convey that what develops is the way in which sexual energy accumulates and is discharged as we mature biologically.
