Experience from RCM and RDS-PP coding for offshore wind farms

The RDS-PP is (after official publication of the ISO/TS 16952-10) a designation which is supported by international standards. The RDS-PP integrates systematic structures and letter codes which are applicable to all industries, which in the medium term will result in an easier integration of "standard components" into the power plant process.

VGB KKS-RDS-PP - [PDF Document]

The RDS-PP is in full agreement with the national/international sector-specific standards for power plants ISO/TS 16952-10 and DIN ISO/TS 16952-10 and thus complies with the mentioned international standard for reference designation systems. The RDS-PP can thus be considered to be a standard-conforming designation system.

VGB PowerTech: RDS-PP – Transition from the KKS to an

Basic Rules. Within the best practice RDS-PP group we're using a basic set of rules which is a limited set of the applicable RDS standards. Below we have stated the set of the very basic rules we're using when we're coding our structures.
