Self-efficacy is an individual's belief in their innate ability to achieve goals.Albert Bandura defines it as a personal judgment of "how well one can execute courses of action required to deal with prospective situations". Expectations of self-efficacy determine whether an individual will be able to exhibit coping behavior and how long effort will be sustained in the face of obstacles.

The following trans-, gender-, sexuality-, and activism-related terms regularly appear in my writings. In addition to the definition, I will often add clarifying information and links to further discussion (sometimes citing passages from my books *Whipping Girl*, *Excluded*, and *Outspoken*). Most other links will take you to the glossary entry for that particular word or phrase.
